## SECTIONS 5: FIRE-FIGHTING MEASURES

Suitable Extinguishing Media:	Use water spray, alcohol-resistant foam, dry chemical, or carbon dioxide.
Inappropriate Extinguishing Media:	No further relevant information.
Specific Hazard Arising from the Mixture:	Carbon oxides.
Specific Protective Actions for Fire-Fighters:	Wear a self-contained respiratory protection device.

## SECTIONS 6: ACCIDENTAL RELEASE MEASURES

Personal Precautions, Protective Equipment, and Emergency Procedures:	Ensure adequate ventilation. Avoid breathing vapors. Wear appropriate personal protective equipment. See SECTION
---	--

Environmental Precautions: 2 for a list of relevant precautionary phrases. See SECTION 8 for personal protective equipment. Prevent further leakage or spillage if safe to do so. Do not let product enter drains/sewers/surface or groundwater.

Methods and Materials for Containment and Cleaning Up: Contain spillage. Ensure adequate ventilation. Absorb large spills with liquid-binding material (sand, diatomite, universal binder, sawdust) and place in an appropriate container. Place the container for disposal according to local regulations. Clean the area before returning. see SECTION 13 for disposal considerations

## SECTIONS 7: HANDLING AND STORAGE

Precautions for Safe Handling: Eating, drinking, and smoking in the work area is prohibited. Wash hands after use. Remove contaminated clothing and protective equipment before entering the eating area. Avoid contact with skin or eyes. Avoid inhalation of vapor or mist. See SECTION 2 for the full list of GHS precautionary statements.

Precautions for Safe Storage, Including Any Incompatibilities: Store in the original container. Keep the container tightly closed in a well-ventilated place. Containers once opened must be carefully resealed and kept upright to prevent leakage. Do not fill the container with anything. Do not pour material back into the container after dispensing. No recommended storage temperature for the mixture but avoid excesses in temperature and store at room temperature when feasible.

## SECTIONS 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

Control Parameters: Contains no components with occupational control parameters.

Exposure Controls:  
Appropriate Engineering Controls: Handle with good manufacturing practices. Wash hands before the break and at the end of the workday.

Personal Protective Equipment  
Eye/Face Protection: Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).

Personal Protective Equipment  
Skin Protection: Handle with gloves. Suitable gloves include latex, nitrile, butyl rubber, neoprene, norfoil, and viton, depending on the extent of contact. Gloves must be inspected prior to use. Use proper glove removal technique to avoid skin contact with the product. Dispose of contaminated gloves after use following any applicable laws and good laboratory practices. Wash and dry hands.

Personal Protective Equipment  
Body Protection: Wear impervious clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the workplace.

Personal Protective Equipment  
Respiratory Protection: When risk-assessment shows air-purifying respirators are appropriate use a full-face respirator with a multipurpose combination (US) or type ABEK (EN14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of Environmental Exposure: Prevent further leakage or spillage if safe and feasible to do so. Do not let product enter the drains. Discharge into the environment should be avoided.
